[08:20:35] **Eric Mugisha** : Sorry, we've failed to log you into cPanel. Please try again or contact support.

cPanel/WHM access

[08:20:37] [Suzy Q joined the chat]

[08:20:55] **Suzy Q** : Hello! Thank you for contacting our Namecheap support team.

To assist you with your cPanel login issue, please first review this guide for troubleshooting steps:

<https://www.namecheap.com/support/knowledgebase/article.aspx/9976/29/i-cant-access-cpanel-what-should-i-do/>

If you have already tried these steps and still cannot access cPanel, could you please provide your cPanel username or the domain name associated with your hosting account? This information will help us proceed further.

[08:23:22] **Eric Mugisha** : the issue is i bought hosting and i want to migrate my cpanel to your hosting

[08:23:44] **Suzy Q** : To migrate your cPanel account from another provider to Namecheap hosting, you can take advantage of Namecheap's free migration service, provided your current hosting account is active and uses cPanel. Here's how the process works:

Make sure your current hosting account will remain active for at least 3 days after you submit your migration request. This ensures there is enough time to complete the transfer without data loss.

Purchase a Namecheap hosting package that meets or exceeds the specifications of your current account. Once your Namecheap hosting is active and you receive your Welcome email, gather your current cPanel account details (login URL, username, password, and, if possible, SSH access details).

Submit a migration request by emailing the required details, including your Namecheap account username and support pin, your current hosting credentials, and any additional information about your websites or preferred migration timing. The migration team will validate your account, check compatibility, and handle the transfer for you.

After the migration is complete, you will need to update your domain's nameservers to point to Namecheap's hosting servers. During DNS propagation (which can take up to 24 hours), some visitors may still see your old site, but this transition is typically seamless if your old hosting remains active. For more details on the process and what information to provide, refer to the following guide:

<https://www.namecheap.com/support/knowledgebase/article.aspx/9342/2199/how-to-transfer-hosting-account-to-namecheap/>

If you have a full cPanel backup downloaded, you can upload it to your new Namecheap account's Home directory via cPanel File Manager or FTP, then request restoration. For step-by-step instructions on both active and backup-based migrations, see:

<https://www.namecheap.com/support/knowledgebase/article.aspx/9338/2199/cpanel-shared-hosting-account-transfer-to-namecheap/>

Be sure to keep your old hosting active until DNS propagation is fully complete to avoid downtime. If you need to check your website on Namecheap's servers before switching DNS, you can use the method described here:

<https://www.namecheap.com/support/knowledgebase/article.aspx/9178/27/how-can-i-check-the-content-of-my-website-before-switching-the-dns-records/>

[08:33:45] [Suzy Q left the chat]

[09:04:28] **Eric Mugisha** : Please try again in a few minutes. Your cPanel account has not been created yet

[09:04:30] [Suzy Q joined the chat]

[09:04:46] **Suzy Q** : Thank you for your message. It appears that your cPanel account has not been created yet, which is why you are unable to log in or start the migration process.

Could you please confirm when you purchased your hosting package with Namecheap? Sometimes, it may take a short while for the cPanel account to be set up after purchase. If you have received your Welcome email with your hosting details, please let me know. If not, please check your email (including spam/junk folders) for any updates from Namecheap regarding your hosting activation.

Once your cPanel account is created and you have received your login details, you will be able to proceed with the migration. Have you received your Welcome email with your cPanel login information yet?

[09:06:05] **Eric Mugisha** : Date: Jun 4, 2026 02:46:57 AM EST

[09:06:22] **Suzy Q** : Thank you for providing the purchase date. Since you purchased your hosting today, it may take some time for your cPanel account to be fully set up. Usually, the setup is completed within a few hours, but in rare cases, it might take a bit longer.

Have you received your Welcome email from Namecheap with your cPanel login details yet? If not, please check your inbox and spam/junk folders for any emails from Namecheap. If you have received the Welcome email, please let me know so I can guide you on the next steps for migration. If you have not received it, please confirm so I can note this for the live agent to assist further.

[09:09:01] **Eric Mugisha** : haven't received email from Namecheap with cPanel login details yet

[09:09:19] **Suzy Q** : Thank you for confirming that you have not received the Welcome email with your cPanel login details yet. Please double-check your spam or junk folders to ensure the email was not filtered there.

If the email is still not found, I may need help from a live agent with this, please stand by, I will find an appropriate person.

[09:09:28] [Suzy Q left the chat]

[09:09:36] **Inna S.** : Hello, I will assist you further. Would you please allow me a few minutes to look through your previous conversation?

[09:12:11] **Eric Mugisha** : no worries

[09:13:55] **Inna S.** : You are referring to a hosting package for rwandacda.org, right?

[09:14:01] **Eric Mugisha** : yes

[09:14:37] **Inna S.** : I see. Please let me transfer our chat session to the Billing Support representative for further assistance with your question.

[09:15:05] **Eric Mugisha** : thanks let me know when i expect feedback

[09:15:34] [Bhavadharsana A. joined the chat]

[09:15:34] [Inna S. left the chat]

[09:15:44] **Bhavadharsana A.** : Greetings, Eric!
This is Bhavadharsana assisting you today. Kindly allow me 8–10 minutes to review your case and provide the best possible assistance.

[09:24:14] **Bhavadharsana A.** : I may need 10 minutes.

[09:25:29] **Eric Mugisha** : let me know

[09:30:11] **Bhavadharsana A.** : I will transfer this chat to a specialist who will continue assisting you further.

[09:30:25] **Eric Mugisha** : okay when

[09:31:05] [Olena O. joined the chat]

[09:31:06] [Bhavadharsana A. left the chat]

[09:31:12] **Olena O.** : Hello Eric. My name is Olena, and I will be glad to assist you further. Would you please allow me a few minutes to look through your previous conversation?

[09:33:24] **Eric Mugisha** : no worries

[09:34:06] **Olena O.** : Thank you.

[09:39:23] **Olena O.** : Please allow me 7-10 minutes to look through your request and check the necessary details.

[09:45:23] **Olena O.** : I would like to let you know that I am still working on your request, I need 3-5 minutes more. Thank you for your patience.

[09:45:34] **Eric Mugisha** : no worries

[09:51:05] **Olena O.** : Sorry for keeping you waiting. I am checking the new hosting package now and will update you in 5-7 minutes.

[09:55:06] **Eric Mugisha** : let me know if it will take time

[09:57:46] **Olena O.** : I am working on it; I will try to do my best and will update you in 5 minutes.

[10:02:56] **Olena O.** : Thank you for waiting. According to my check, your rwandacda.org domain name is registered with another Registrar.

Per our internal policy, a hosting service can be purchased by the domain owner only. To proceed with the hosting package activation, we need to validate the control over the domain.

Please perform one of the following steps:

1. Add dns1.web-hosting.com as one of your domain name nameservers in the account panel of your Registrar;
2. Update the nameservers to the values listed below in the account panel of your Registrar:

Nameserver 1: dns1.namecheaposting.com
Nameserver 2: dns2.namecheaposting.com

Note: NS update may cause DNS propagation and downtime for the working website.

3. Add the following TXT record(s) to the domain name DNS system:
====
https://seureshare.support/secret/dUd0nqKDhYEIR4IfyBdlIYHWoyd7ZakS
====

Note that the TXT record update depends on the TTL record. It may take some time for the propagation to take place.

[10:07:09] **Olena O.** : Just checking if our chat conversation is still active.

[10:11:52] **Eric Mugisha** : thanks I will update it and then reach out i think it will be easier

[10:13:24] **Olena O.** : Okay, sure. I will send the follow-up email to you so you can update us there. Please tell me if there is anything else I can do for you now.

[10:19:05] **Olena O.** : Apparently, our chat session has expired. Feel free to get back to us at any moment.

Thank you for contacting Namecheap Live Support!

[10:19:10] [Olena O. left the chat]

[10:19:33] **Eric Mugisha** : send me email no probelm

[10:23:15] [Artem B. joined the chat]

[10:23:22] **Artem B.** : Hello, I will assist you further. Will need 5-10 minutes to look through your case.

[10:31:49] **Artem B.** : Apparently, our chat session has expired. Feel free to get back to us at any moment. Thank you for contacting Namecheap Live Support!
